Survey on practices and attitudes across Europe

Survey on practices and attitudes across Europe

- First results:
 - N = 246 (68% teachers of methodology)
 - mostly from Biomedical & life sciences (41%) and social sciences (27%)
 - 24% non-permanent positions

Discussion

- How to obtain responses of more diverse sample in terms of non-methodology teachers, discipline and geography?
- Next steps: embrace diversity versus sharing generic best practices?
